Replacement Abstract

TOILET ODOR BLOCKING SYSTEM, METHODE OF USE AND BIDET

Inventor: Zoltan Egeresi

Santa Cruz, CA

ABSTRACT OF THE DISCLOSURE

The object of this invention is create an inexpensive highly effective toilet odor blocking system

with low maintenance, low cost to block any or all odor from escaping from the toilet bowl by

generating a continuous stream of bubbles to cover human waste using liquid soap, air pump and

low volume water flow. Same system with higher water volume becomes a toilet bidet by using a

special bubble / bidet adapter.
